

Press release, Eindhoven 4 November 2021

Welcome to GLOW Eindhoven 2021!

Considering the Corona measures, light festival GLOW can continue.

This year GLOW will take place in four areas in the city. These four areas have been designated as transfer locations. The locations are limited and are only accessible with a coronavirus entry pass in combination with an ID card or a wristband.

Eindhoven has been using wristbands for the catering industry since October, which you receive when showing a coronavirus entry pass in combination with an ID card. The four GLOW locations will also be accessible with a wristband that is available at various distribution points in the city.

The city center of Eindhoven will of course remain freely accessible. The light ornaments that have been built, will illuminate this area until the beginning of January 2022.

The GLOW organisation has already anticipated possible corona measures in January 2021 and has therefore not created a walking route. Due to the wide spread of the four locations, GLOW visitors have sufficient opportunity to keep their distance from each other. Visitors are reminded of the government's advice to observe the 1.5 meters of distance. The municipality, security services and the GLOW organisation are in close contact to organise everything in the right way in the interest of public health.

Ronald Ramakers, director of GLOW: "Let's take care of each other, then GLOW 2021 will also be a fantastically beautiful light event!"
